

# Semantic (non-)compositionality and (re-)categorization in flexible languages

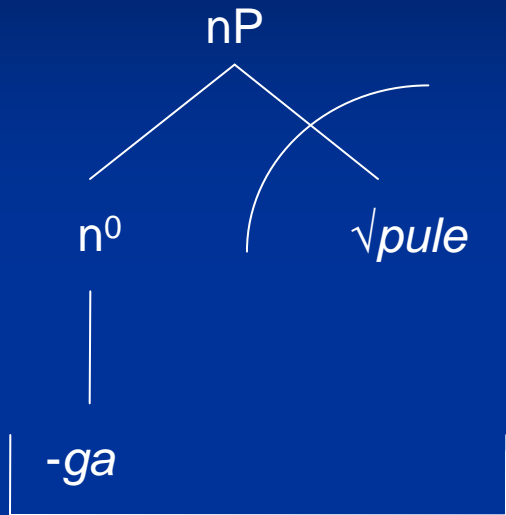

Eva van Lier & Jan Don  
University of Amsterdam

# Outline of data presentation

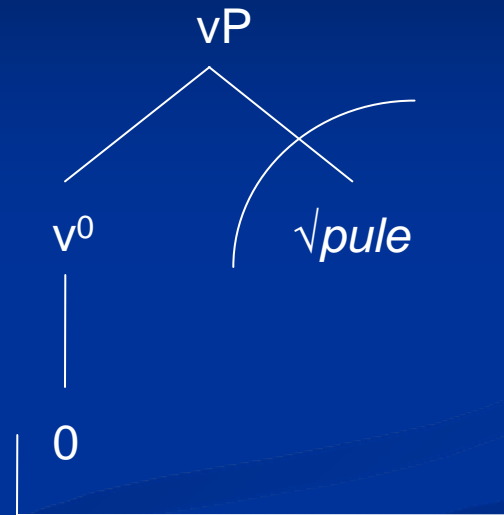

- Flexibility: Semantically compositional syntactic categorization
  - Phrase-level flexibility
- Derivation: overtly marked, semantically non-compositional lexical derivation
- Conversion: zero-marked, semantically non-compositional lexical derivation
  - Flexibility of (zero-)derived lexical items?

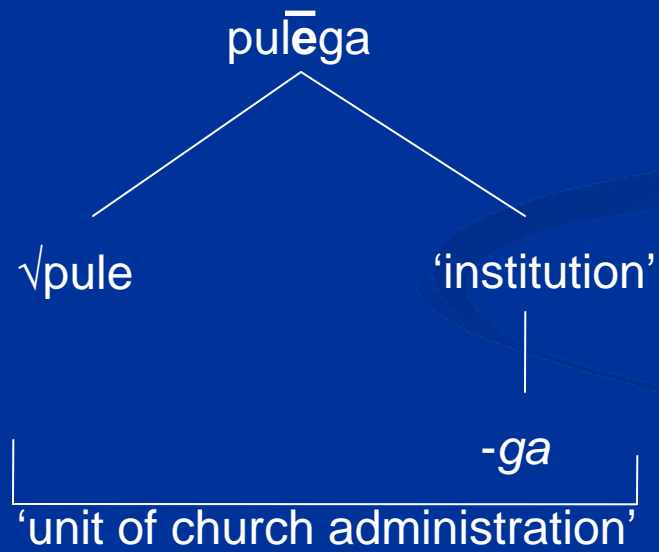

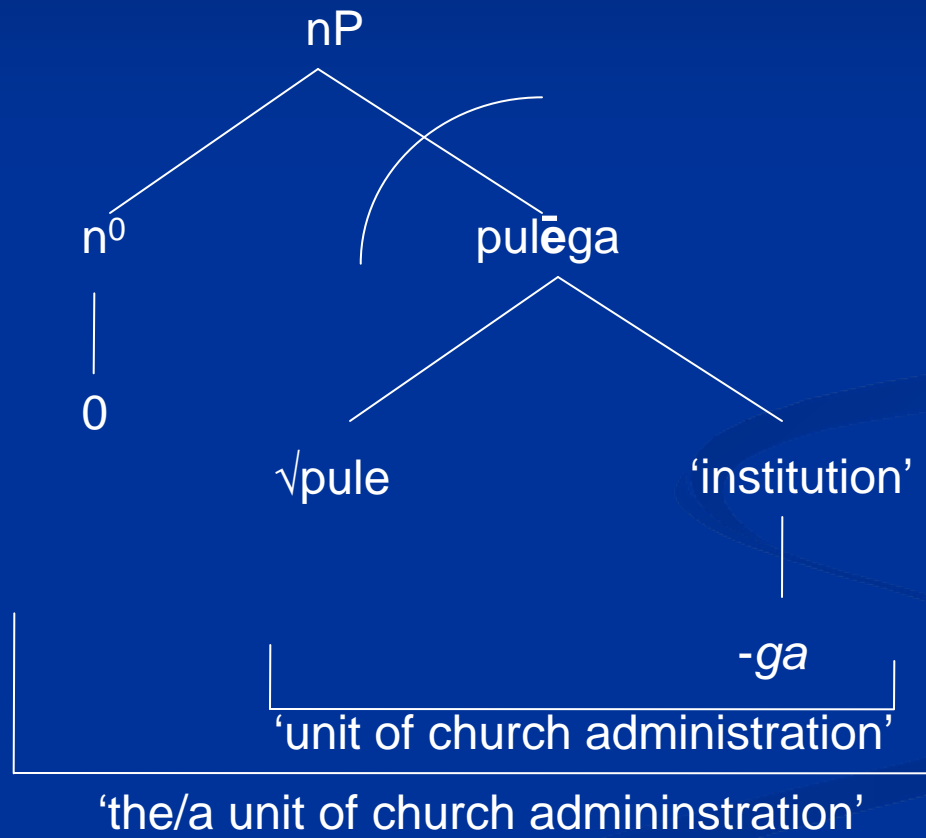

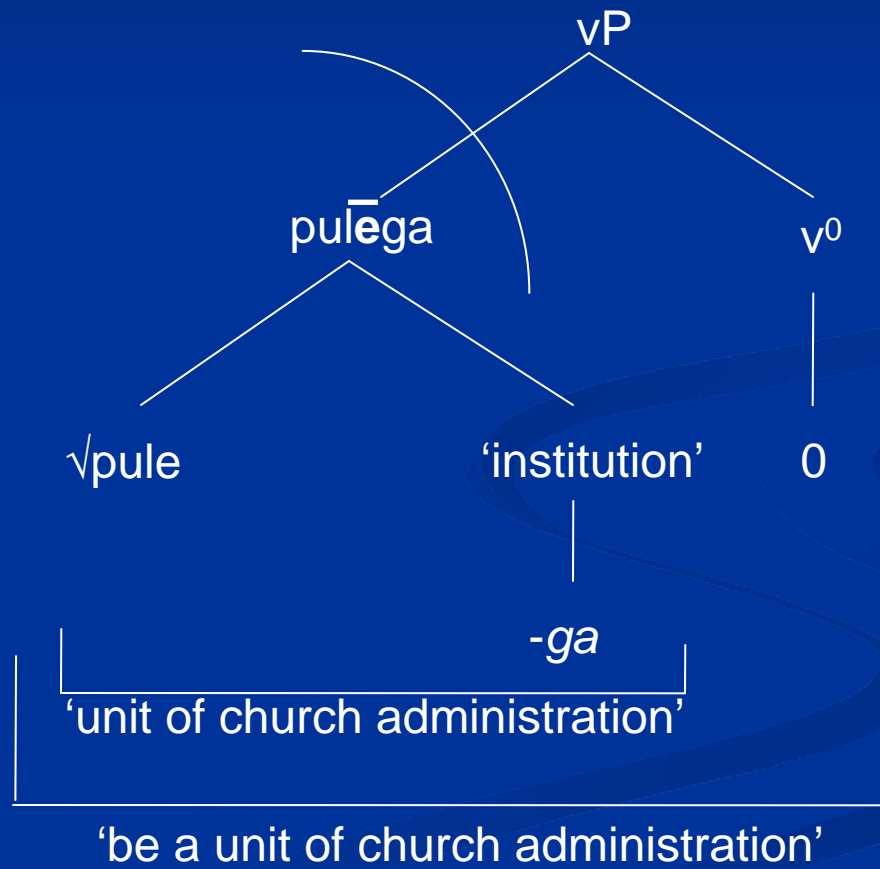

'controlling'

'to control'
